INTRODUCTION

The Future of Document Automation

USE CASE 01

Supplier Onboarding

THE PROBLEM

Manual supplier onboarding takes weeks, with multiple stakeholders reviewing documents across different systems. This delays vendor setup and creates inconsistent compliance checks.

THE OPPORTUNITY

Automated document extraction and validation accelerates onboarding by 80%, while ensuring all compliance requirements are met consistently.

- Automatic document classification and data extraction
- Multi-stakeholder workflow orchestration
- Compliance rule engine with audit trails
- Integration with existing ERP systems

> **"We reduced supplier onboarding time from 3 weeks to 4 days."**
>
> — Supply Chain Director, Fortune 500 Retailer

USE CASE 02

Contract Review

THE PROBLEM

Legal teams spend countless hours reviewing contracts manually, missing critical clauses and creating inconsistent risk assessments across the organization.

THE OPPORTUNITY

AI-powered contract analysis identifies risks, extracts key terms, and standardizes review processes across all business units.

- Clause-level risk identification and scoring
- Standardized playbook enforcement
- Redline generation and negotiation support
- Centralized contract repository with analytics

> **"Our legal team now reviews 5x more contracts with higher accuracy."**
>
> — General Counsel, Manufacturing Company

USE CASE 03

Claims Processing

THE PROBLEM

Insurance claims processing is slow, error-prone, and inconsistent, leading to customer dissatisfaction and increased operational costs.

THE OPPORTUNITY

Intelligent document processing automates claims intake, validation, and decision-making, reducing processing time by 60%.

- Automated document classification and data extraction
- Fraud detection and anomaly identification
- Straight-through processing for simple claims
- Complex claim routing with decision support

> **"Claims processing time dropped from 14 days to 5 days."**
>
> — Claims Director, Insurance Provider

Workflow Transformation

BEFORE ORCAWORKS

- Manual data entry and document routing
- Siloed systems and disconnected workflows
- Inconsistent processes across teams
- No audit trail or compliance visibility
- Weeks-long processing times
- High error rates and rework

AFTER ORCAWORKS

- Automated extraction and intelligent routing
- Unified platform with integrated workflows
- Standardized, governed processes
- Complete audit trails and compliance reporting
- Days or hours for processing
- 99%+ accuracy with minimal rework

Business Impact

Organizations implementing Orcaworks see measurable ROI within the first 90 days, with compounding benefits over time.

Metric	Baseline	Target	Impact
Processing Time	14 days	3 days	79% reduction
Error Rate	15%	2%	87% reduction
Cost per Document	$25	$8	68% reduction
Team Capacity	100 docs/day	500 docs/day	5x increase
Compliance Score	72%	98%	26 point increase
Customer Satisfaction	6.2/10	8.9/10	43% improvement
